

What About Watercolors?

\$45.00 All materials are included

A watercolor painting class for the very beginner.

Learn the basics of watercolor painting, including the things you need to know about watercolor supplies before you buy them. In this class you are able to test drive watercolors, play around with them, and see if it's something you really want to try.

We will talk about the kind of paper, brushes, and paints you can use, learn the difference between tube and pan paint, and compare watercolor pencils and InkTense pencils. You will be encouraged to try out the different kinds of brushes used, including one that holds water.

The supplies included in this class are more than just paints, but water soluble pencils and inks, and watercolour crayons too. You are encouraged to try them all so you can decide if watercolors are for you.

You will get to practice making a wash, dry brushing, and how the paint will react when salt is sprinkled over it.

This class is 4 hours long and can be split into 2 evenings. No painting experience is necessary, just a desire to try something new and ultimately prepare yourself for an amazing new hobby, Watercolor Painting.
